

## CANADIAN HANOVERIAN SOCIETY

November, 2010

**TO: All Members of:  
The Hanoverian Breeders' Club of Eastern Canada  
The Hanoverian Breeding Club of Western Canada**

**FROM: Michael Boyd**

Our clubs are again sponsoring an importation of frozen semen as a service to our members from the Celle State Stud for the upcoming 2011 breeding season. The importation is open to all members, both full members and associate members.

The Celle State Stud usually posts their new list of stallions in early to mid December, although posting of the new list can be as late as early January. Members wanting to order semen must be able to access the new Celle list on the Internet after it is posted.

The list currently posted on the Celle website is dated 18.01.2010 (January 18, 2010). Please wait until you see the new list posted with a date that should be sometime in December or January 2011. Once Celle has posted their new list please proceed with your order. Celle adds new stallions when they revise their list and sometimes removes stallions and may change some prices, this is why it is important to wait until the new list is posted.

Following are the instructions for accessing the list of available stallions:

Go to the website: [www.landgestuetcelle.de/](http://www.landgestuetcelle.de/)

Click on: the UK flag to get to the English web pages

Click on: Stallions

Click on: Frozen Semen (last revised date is on this page)

Click on: price list as pdf download

This brings up the list of stallions available for export to Canada. Please note there are a few stallions on the list that are not available for export to Canada.

I would like to receive all payments in Canadian dollars and I will forward payment to Celle in Euros. The euro/Canadian conversion is on the order form. Due to the costs involved we will only order a shipment if we get 30 or more doses ordered. If we do not get 30 doses ordered all funds will be returned.

If you want to order frozen semen please fill out the form and return the form with your payment to Michael Boyd at 12 Country Club Drive, Toronto, Ontario M9A 3J4.

**Payment must reach Mr. Boyd by January 21, 2011.** The order will then be placed with Celle, we get an Import Permit for the shipment and a dry shipper is sent to the State Stud. The shipment should arrive about mid to late March and after clearing by the Canadian Food Inspection Agency is available.

We will use GenCor again this year to receive the shipment and store it. Once the shipment has arrived and been cleared by the CFIA we will notify everyone participating in the shipment. The GenCor facility is located just north of Woodstock, Ontario. The shipping charge per dose pays for all the costs to get your semen order into storage at GenCor. When you have been notified that the shipment has been cleared by the Canadian Food Inspection Agency you will have to arrange for a dry shipper to be sent to GenCor. They will charge the dry shipper and send it back to where you would like it delivered by courier. You can also arrange to personally take a dry shipper to GenCor and they will fill it with your order.

For the breeders who are ordering from the west, please note that once the shipment is cleared we will pack your orders in one container and ship it to Alta Genetics in Calgary and notify you when it will arrive at Alta Genetics. The extra cost for shipment of the container from Woodstock to Calgary and returning the dry shipper is \$10.00 per dose as found on the order form. If a western member wants to make your own shipping arrangements do not add the extra \$10.00.

In calculating the cost of your order multiply the number of doses ordered for each stallion by the **Conversion Into Canadian \$** amount on the order form.

Please note that this year I have added the cost of HST (8% in Ontario) to the order form. I have been unable to confirm if our shipment will be subject to the Ontario HST. If HST is not charged on our order I will send a refund cheque back to everyone for the 8% HST amount once our shipment has arrived and if HST is not charged on it.

Add the GST and HST for the Canadian dollar total of your order plus the shipping charge for the number of doses ordered. Send your order form and cheque, bank draft or money order **payable to Michael Boyd** for the total amount.

If you have any questions regarding the shipment or would like to discuss stallion selection contact Michael Boyd at (416) 239-0624 (email: [mmboyd@rogers.com](mailto:mmboyd@rogers.com)). We wish all our members the best of luck in the upcoming breeding season.
